

NAME

pb, aka project-builder.org – builds packages for your projects

DESCRIPTION

pb helps you build various packages directly from your project sources. pbdistrocheck is a command from the pb project providing the same type of services as lsb_release, but extended.

SYNOPSIS

```
pbdistrocheck [-h][-d][-v][-l [-c][-i][-r][-a]][-s] [distro-ver-arch]
```

OPTIONS

-h|--help

Prints this help

-v|--verbose

Print a brief help message and exits.

-a|--all

Print all parameters

-s|--short

Generate a short format user friendly, comma separated allowing parsing

-l|--lsb

Generate an LSB compliant output

-d|--description

Print only description (LSB only)

-r|--release

Print only release (LSB only)

-c|--codename

Print only codename (LSB only)

-i|--id

Print only distribution identifier (LSB only)

-a|--all

Print all LSB fields

ARGUMENTS

Arguments are optional. If none given, analyzes the underlying operating system. If one is given, it should have the format `osname-version-architecture`, and in that case pbdistrocheck will provide all the information related to that OS needed by pb.

WEB SITES

The main Web site of the project is available at <http://www.project-builder.org/>. Bug reports should be filled using the trac instance of the project at <http://trac.project-builder.org/>.

USER MAILING LIST

Cf: <http://www.mondorescue.org/sympa/info/pb-announce> for announces and <http://www.mondorescue.org/sympa/info/pb-devel> for the development of the pb project.

CONFIGURATION FILES

Uses the main `/etc/pb/pb.conf` (or `/usr/local/etc/pb/pb.conf` if installed from files) configuration file to give its answers.

AUTHORS

The Project-Builder.org team <http://trac.project-builder.org/> lead by Bruno Cornec <mailto:bruno@project-builder.org>.

COPYRIGHT

Project-Builder.org is distributed under the GPL v2.0 license described in the file `COPYING` included with the distribution.
